Mentimeter

# What are the most pressing climate resilience issues facing your community?

Fire

denial

Lack of water due to drought, impacts to agriculture, and increased summer temperatures

heat

Wildfire

Water scarcity, wildfire

Wildfire

Warmer springs and summers

37

Mentimeter

# What are the most pressing climate resilience issues facing your community?

Drought - flood extremes

Extreme heat

Changing weather, higher temps, drought

Coastal erosion

Wildfires drought

Heat, wildfires, drought

flooding

FIRE

37

Mentimeter

# What are the most pressing climate resilience issues facing your community?

Tribal lands are small, need access

Smaller water supply

water, heat, energy use, health, biodiversity loss, pressure on natural systems

Denial

Heat stress, loss of surface water, rapid expansion of invasive plants and fire

Drought and fire water rights/availability

culturally significant plants declining

food security

37

Mentimeter

# What are the most pressing climate resilience issues facing your community?

access and reliable energy,

Heat

Food sovereignty

Drought, wildfire (overgrown forests), overgrazing from feral horses and other livestock, loss of water rights.

Extreme drought, wildfires Lack of community involvement

Wildfires and extreme heat. Whiplash events. Lack of addressing CC community wise.

Water

stress on wildlife

37

Mentimeter

# What are the most pressing climate resilience issues facing your community?

grant funding to implement or plan

Social & environmental injustice

Toxic pollution

weather impact to indigenious farms and environment

No snow

Survival
